

ABSTRACT

A method for a first device to access the services supplied by a second device by establishing a communicative connection between the first consumer device and a first server. The first server, establishes a communicative connection between 5 the first server and a second server. The second server establishes a communicative connection between the second server and the second device. Once the communicative connection are established, a service request can be sent from the first device, to the second device utilizing the communicative connections. In response to receiving the request the second consumer device 10 can perform the requested service.
